Abstract: Under the Resource Conservation and Recovery Act (RCRA), as amended, Congress directed EPA to implement a comprehensive program for the safe management of hazardous waste. The core of the national waste management program is the regulation of hazardous waste from generation to transport to treatment and eventual disposal, or from "cradle to grave."

Section 3001(d) of RCRA requires EPA to develop standards for small quantity generators.

Section 3002 of RCRA states, among other things, that EPA shall establish requirements for hazardous waste generators regarding recordkeeping practices. Section 3002 also requires EPA to establish standards on appropriate use of containers by generators. Finally, Section 3017 of RCRA specifies requirements for individuals exporting hazardous waste from the United States, including a notification of the intent to export, and an annual report summarizing the types,

quantities, frequency, and ultimate destination of all exported hazardous waste.
